Mpress Signal White S - battery-free Casambi switch, Exxact

Article numbers and versions

V-42B2206-003Y

Application

Battery-free Casambi wall switch in signal white, designed for Exxact frames. Both single and double rockers are supplied. Control luminaires, groups or scenes and dim with a long press. No power cable is required.

Installation and configuration

• Place the switch within working radio range of a mains-powered Casambi unit. The manufacturer guidance is up to 15 m indoors under ideal conditions; actual range depends on placement and the building.

• Check the module revision and network radio mode before pairing. Long Range support has not been verified for this stocked version.

• Select the correct faceplate image in the app before assigning button functions. This article uses the Exxact design; S and E identify different frame systems, not merely colours.

Get started with Casambi

Use the Tedson illustrated guides to create a network, select the correct fixture profile and test the functions in the installation.
